

PRODUCT INFORMATION.....

S 400

A very quiet Strip-Cut or Cross-Cut Shredder with large Container for Small and Medium sized Offices.

roto®

S 400 Series

Same features as the ROTO S 300 but with a larger waste basket and fully mobile castors.

The receptacle is very easy to remove by opening the front; therefore no lifting up of the cutting unit is required. The machine automatically turns off when the door is opened or if the machine is overloaded with paper.

Full DINA4 working width with an angled throat. This shredder can also fit under your desk!

Features an automatic On/Off control via light barrier when in stand-by mode. Will also automatically stop when machine is overloaded or the paper is jammed. This means the shredder turns on and off automatically when paper is inserted.
